The original Hexcells appeared from nowhere in my inbox in September, and I fell instantly in love. The second game, Hexcells Plus, arrived in December, after we'd already decided the original deserved a spot in our top games of 2013. I've replayed both games multiple times, because it's a puzzle game of exquisite pleasure, delivered with calm poise Absolute beauty. I was ready to think that I liked Hexcells Infinite. Here is the trouble I think: of course I like Hexcells Infinite. It is absolutely wonderful. It is sublime, in fact. Ambient air, the total magic of solving quickly literally making music, while the silent and constant solution is felt like a massive victory after the victory, and the sense of artists behind the realization of the puzzles, puts this one above. This third and final (sniff) installment is far the most hard so far, another 36 puzzles that quickly reintroduce all the concepts from the first two games, and force you to think more hard than ever. To view this content, enable destination cookies. Hexcells offers that ideal position of apparent simplicity, but a deep complexity. You have to color a hexagonal blue or delete it. Here you are. The rules with which you know how to do it at first they feel they remember of mineSweeper, but quickly it becomes evident how poor a comparison is. This is not a random hope - it is precision calculation. Each puzzle that requires to take in all available information, and then make logic jumps to apply it. What was once relatively simple but engaging puzzles in the original game are now the studies lasting now, where you become certain there is an error, which there is no move on the left to discern, maybe go away for a little, and then go back to realizing it, and feel as if I changed the world. One of the key things of the Hexcells game is how brilliant makes you feel on you to find a next move. It is difficult to resist calling other people in the room and focusing on the screen, explaining how intelligent it was to have known that hexagon should be blue. However, this should be resisted à € "People do not understand. But I understand. I always understand. Once again the game has a ore ore of .not onognuigga cile iout i iuc ni ,dnuorgkcab ni acisum id elatneibma Annoyed by an added delay in Plus to allow this to become more musical, but I was totally won by the idea this time. It is ridiculous how to calm the atmosphere becomes, contrasting the desire to tear your hair out not to identify your next move. And with Infinite, the creator Matthew Brown frees himself to continue to continue more puzzles with the creation of a random puzzle generator. Put in a string of 8 digits, and create a unique puzzle to that number. It has one possibility to casually choose a number, or allows you to use today's date to offer a notion of a daily challenge. Or you could go around and start at 00000001 and do your way. Of course these enigmas generated randomly are not the same as one hundred or so brown has done by hand "" It is immediately a different experience, the sense of the craftsmanship removed. They tend to be more splashes, less refined. But I still find them a huge pile of fun to play. In fact, after having set in total Bemusement to the six final puzzles in the main game for many hours, having a large but easier version of the game is a very pleasant alternative. With the ability to share the code for a particularly good self-generated puzzle, it seems that a community soon collapses the best numbers to be

gited, creating à € àltaçhettîà € extra-official for the game. It would be nice to see an option for something like the one built in the game à € "A way to change the mouse button colles to share with others. For the moment, it is going to be in a notes, I think. A couple of frustrations from previous games are fixed, too much. The level of the level of the game strangely different in the menu screen and in-published are not more. And the option to change the mouse buttons above (like all good people will be) is now beautiful and and marked as an option when you start. Recently I have sacked my list of games to examine which titles could be completed easily or some of my favorite games that deserve to sit at 100%completion. Before starting this, à € à,~ èquest "in Si, I had a total of over 250 games in my steam catalog, with zero completions. In the last month, this has risen to 274 games, but 14 completions . A small note on a margin here - Steam has a strange way of collecting DLC. In some games it is displayed as a separate title and has a separate completion rate. For others it is grouped in the main title. Consequently, websites such as HTTP://www.achievementstats.comasti separate the two and count them as individual completions. So, while Steam says 274 games / 14 completions, Achievementstats says 294 games / 22 completions. For reasons of facilitating, I used the latter. Similar to As you can get closer to the hunt for the results of Xbox 360, it listed the games that I completed in different sections based on the time to complete or difficulty to complete. Some games are completed 100% simply by following the history modality, which usually it's simple. Others require collectible missions, which add time, or some are decidedly difficult with results such as à € à,~ à à complete x on hard in less than 2 minutes "or something similar. Part of this list is also to collect some of these more easy completion titles, also adding some of the games that I love that they deserve to be 100%listed, regardless of the difficulty. So here is the list of Achievementstats, starting with Easy Games - with a brief description of the time to complete and difficulties followed by my "complete": Easy Games to Bird Story - 1.2 hours, complete history Sunal Sunlight "à € à € 004.4 hours, history adlug adlug anu iuges, ero 2-1 ~à cÀ ~à €Àetinifni sillecxEh adlug anu iuges, ero 2-1-sillecxEH .oediv ied enif alla atlas ,»À emag E ~à cÀ sitarg aro 1 < ~à ~à cÀ eracoig ad atiutarg nal -nal - ò lerup itisnecor onnaras atsil atseuq a tnuigga onos ehc ihcoig ivoun e ,itunevneb i erpmes onos itnemnoc I .onaiccaf ol non ovitom isaislaug rep am ,olraf ebbertop maetS ehcna o ,olraf orebbertop ehcitsats eL itatlusiR ,elliciffid otlom Àltaer ni "À ,enosrep etnauc ad itatelpmoc itats onos ihcoig itnauc o ,eratelpmoc rep opmet ni itarucca itad eravorT 2 aicroT )'op nu onnarrov ic acsep alled itatlusir i( aicroT 4 woR stniaS 3 woR stniaS 2-IIIX ysatnaF laniF IIIX ysatnaF laniF IIIV ysatnaF laniF )+ ero 52( IIV ysatnaF laniF )eroval la itatlusir i rep odnatpepsa( enoizanracnieR :leuqeS-erP noddegamraC II :sdnalredroB .opmet len etneuges li %001 la oilgov ehc 'etelpmoc oT semaG' oim len etneuges li oh ,itseuq a ertIO )yrotS etepmoC( etnanimmaC otroM li aguF II à noisreveR eM anigammi :etrap ad ossem Àig oh ehc isrevid onos iC .erepas olemetaf otnemireggus ehclauq eteva es idniug ,eratelpmoc ad ilicaf ihcoig id acrecir alla erpmes onoS aciffiter id' op nu ,ero 51-01 à noitpmedeR daoR idroccar i rep oediv adlug al eridges ,srh01 ~ à rotalumS taoG ttelracS onatipac led CLD :2 sdnalredroB kcolremmaH rIS id CLD :2 sdnalredroB aniT id CLD :2 sdnalredroB CLD eugroT .rM :2 sdnalredroB +srh03 ,amirp CLD e airots Àtiladom al osrevartta eracoig à 2 sdnalredroB ©As rep id +srh6 edelhcir otseuq à CLD sàxxoM daM :sdnalredroB aciffiter al onodelhcir atloccar alled itatlusir I à CLD partpaIC :sdnalredroB CLD xxonK lareneG :sdnalredroB CLD deN eibmoZ :sdnalredroB +srh03 ,amirp CLD e airots Àtiladom al osrevartta acoiG à sdnalredroB :setelpmoC tsum erutrepà 00001 rep adlug anu erazzilitu ,inroig 2-1 à xobdnaS esrevinU airots anoub ,ero 2 à anul. alla Àùà erenet ,Itunim 5 à onaiP II ossecca id unem ,otunim I à epediercni adlug anu eridges ,ero 2-1 à ertlonI
